BETTER HEALTH. BETTER YIELDS. BETTER FUTURE.
SINCE 1997

DCP

FAMAS DCP

Dicalcium phosphate: calcium and phosphorus for strong bones and to help prevent milk fever.

PACK SIZES (TUB)

250 g | 500 g | 1 kg

BENEFITS

01 Promotes strong bone and teeth development

02 Supports metabolic health and prevents milk fever

03 Enhances nutrient absorption and overall growth

04 Improves reproductive performance and herd vitality

ABOUT FAMAS DCP

FAMAS DCP is expertly crafted to deliver essential calcium and phosphorus, critical for strong bone formation and overall health in cattle, sheep, and goats. This supplement plays a vital role in preventing metabolic disorders such as milk fever in lactating cows and ensuring optimal nutrient absorption across all production stages. With its balanced blend of key minerals and supportive nutrients, FAMAS DCP helps maintain reproductive efficiency, enhances growth performance, and supports sustained animal productivity throughout their lifecycle.

HOW TO USE

Mix the recommended dosage into the daily feed ration as advised by your nutritionist or veterinarian, ensuring even distribution throughout the feed. Always provide fresh, clean water alongside the supplement.

Ask for FAMAS at any Agrovet near you

Bulk orders delivered to shops, farms and dairy cooperatives.

Use at the recommended dosage, as directed by a veterinarian or animal nutritionist.
